## EXPERIENCE

### Web Development Back-end – Self Paced Intern

WorInWell

December 2023 – March 2024, Prayagraj ,UP

- Designed and developed 5+ dynamic web pages for administrative and user dashboard views, enhancing user experience.
- Managed CRUD operations for bookings, achieving seamless management for 50+ simultaneous booking updates.
- Optimized database schema and implemented foreign key constraints to ensure data integrity, reducing errors by 15%.
- Developed a robust Booking Management System (BMS) using Laravel MVC architecture, managing over 500 bookings during testing.
- Implemented role-based authentication and user session management, ensuring secure access for 100+ users.

## PROJECTS

### Booking Mangement System

WorInWell • February 2024 – March 2024

- Developed a **Booking Management System (BMS)** with Laravel, enabling users to **book and manage appointments** seamlessly.
- Handled over **500 booking records** with improved data management and security features, enhancing system usability for **100+ active users**.
- Reduced server load by **20%** through strategic optimization of middleware and query efficiency.

### To-Do List Application

WorInWell • February 2024 – March 2024

- Developed a full-fledged task management system using PHP, capable of managing **1,000+ tasks** with responsive UI and data management.
- Implemented full CRUD (Create, Read, Update, Delete) functionality, ensuring users could easily interact with their tasks.
- Integrated **MySQL** to store and retrieve tasks, achieving **fast data retrieval times** for up to **100 concurrent users**.

### Laravel Task Manager App

WorInWell • February 2024 – March 2024

- Designed and implemented a **Task Manager application** using Laravel, featuring **10+ RESTful API endpoints**.
- Achieved an **API success rate of 98%** during integration testing using **POSTMAN**.
- Optimized API response times by **30%**, improving performance and ensuring scalability for a growing user base.

## EDUCATION

### Bachelor of Technology in Computer Science and Engineering

prayagraj • 2027

## CERTIFICATIONS

### Web Development Back-end

WorInWell • 2024

## COURSEWORK

### C Bootcamp

Udemy • 202420 • Logic Building

### Linux Essentials

Udemy • 2024

## SKILLS

Front-End: HTML, CSS, Bootstrap

Back-End: PHP, Laravel

Additional: JavaScript, Python, C, C++

Tools: Git, POSTMAN, ChatGPT
